Chronological Conspectus of Cases

This conspectus lists every case on which this study has been based in date order. Each case is designated by a category, identified by town and participants, and cited with full archival references, to assist future scholars. If more than one category is given, they are divided by a stroke – indicating that the case could be either – or by a comma – indicating that the case could be considered to be both. Individuals who appear in more than one case are indicated with an asterisk.
